Abstract (en)  
[origin: EP1932625A2] Electrical hand tool (2) comprises a striking tool switching unit (18) having a pivoting mechanism which pivots between an active position, in which the striking tool (10) is activated, and a passive position, in which the striking tool is deactivated, using a switching device (4). Preferred Features: The pivoting mechanism has a pivoting part (24) which pivots on a first rotary bearing and is coupled with the switching device.
