Abstract (en)
[origin: WO03039872A1] The invention relates to a printing group (01) that comprises at least one printing group cylinder (03; 07) and one inking system (02) with at least one roller. The printing group cylinder and the inking system are rotationally driven by different drive motors (08) via respective mechanically independent transmissions (09). Every rotational transmission is configured as a transmission that is shut off from the exterior.
