Abstract (en)
The principle of operation in the invention is partly to give a wine bag-in-box a position in a suitable level above the tabletop to allow a wine glass to be moved under the tap valve to be filled and partly give space to contain a wine bag-in-box in the cavity for transport and comfortable storing as one unit. The function of the invention is obtained by having a seat (1) for the wine bag-in-box fixed in a standard turning about an axis (6). The seat (1) is able to turn from the lowest store position and up to the drawing position.
