Abstract (en)
[origin: EP1932999A2] A door leaf moves along a preset track between opening and closing positions and has a number of panels (3) interconnected so as to swivel on axles (6) running crosswise to the preset track. A rail (5',5'',5''') guides the panels along the preset track. Panels carry a locking element to engage a stationary counter element or to insert in it when the door is closed.
