Abstract (en)

[origin: EP1933005A1] The anchoring device (1) has a tensioning element (2) that is anchored at an end (2a) in the base to stabilize, and the other end (2b) make an influence on the force transmission plate (5). The force transmission plate lies at the front surface (6a) of the buckling body (6) by a bearing surface. The bearing surface is smaller than the front surface of the buckling body.
