Abstract (en)

[origin: WO2007029910A1] Provided is a cordless iron storage case with a cover that reverses to double as a stand for a cordless iron and a power supply unit formed at the rear of the case to allow the iron to be used while seated on the case, and capable of safely storing the cordless iron within. The case forms a storage compartment for storing the cordless iron, a cord winder on a floor plate inside its lower end, and a power supply unit formed at the rear. The cover, for opening and closing the case, has a handle formed on its top and a sliding portion, a power connector, and a protruding portion formed on its bottom. The cordless iron storage case not only allows convenient use of the cordless iron, but also easy storage of the cordless iron on its heat resistant floor plate when its hot plate is still hot and easy stowage of its power cord due to its cord winder.
