Abstract (en)

[origin: DE202005016375U1] The fitting has a mounting plate fixed at an inner side of a cabinet-side wall, and a retaining component fixed at an inner side of the flap, where the plate and the component are connected with each other by a joint lever arrangement. A fluidic damping device (50a) and a damping stopper (51a) are provided, where the stopper runs against the damping device while closing the flap and is assigned to the damping device.
