Abstract (en)

[origin: WO2007038911A1] The invention relates to a link plate (4) and to an articulated chain used for a vehicle propulsion comprising a plurality of link plates which are hingedly connected to each other by means of trust pieces (2), wherein said trust pieces extend in a longitudinal direction with respect to the articulated chain and bearing surfaces are placed on said trust pieces and link plates in such a way that they are enabled to transmit a force through said bearing surfaces, which are produced in an optimal manner.
