Abstract (en)

[origin: WO2007031656A1] The invention concerns a universal electrical interrupt appliance for different fuse formats. In said interrupt appliance (1), the housing (20) and the inner electrical contacts (4) are designed to authorize support elements (6) of the fuse (5c) to be mounted in different mounting positions so as to adjust their pitch to adapt it to different fuse formats. Similarly, the connection of the elements supporting (6) to the fuse (5c) is configured to enable different shapes of connecting pads (50) corresponding to the different fuse formats to be mounted. The invention is applicable to any type of fuse electrical interrupt appliances in any type of installation.
