Abstract (en)  
[origin: WO2007018385A1] An apparatus for providing multiple screens and a method of dynamically configuring the multiple screens are provided. The apparatus for providing multiple screens retrieves the type of the screens in the device and connection relationship therebetween in order to dynamically configure multiple screens that provide a plurality of services on a physical display device. The apparatus for providing multiple screens includes an operation module generating at least one of screens for displaying a received service, and a retrieval module retrieving a screen on which an application included in the service is executed among the screens.
