Abstract (en)

[origin: WO2007041727A1] The invention relates to a measuring device and a method for recording and transmitting measured data recorded using the measuring device, displayed on a display (140) of the measuring device (100). According to the invention, the measuring device (100) comprises an NFC communication module (300), the data output unit of which for output of the recorded measured data to a data transmission module (500), external to the device, in the form of an antenna (400) or a RFID tag (410), is arranged in the vicinity of the display (140) of the measuring device (100).
