Abstract (en)

[origin: EP1935282A1] The brush (10) has a brush part (10a) arranged along a central core (10b) of the brush, and including a set of bristles (10c). An end brush part (10d) is arranged against a gripping handle, and forms bristle tufts (10e). Hardnesses of the brush part and the end brush part are different by defining soft and hard fibers allowing to have the brush parts with different characteristics so as to be adapted to zones of a container based on location of the zones. Hardness degree is given by diameter of the fibers of the corresponding brush parts.
