Abstract (en)
[origin: US2008185407A1] An aid for pulling on stockings, especially compression stockings, comprising two parallel first struts, which are spaced mutually apart and each have a free upper end, and two parallel second struts, which are spaced mutually apart and whose upper ends are connected by an arcuate hoop, characterised in that the second struts are mounted such as to be pivotable about a pivot axis together with the hoop connected to them, said pivot axis running transversely to a longitudinal direction of said second strut, said second struts being movable into a first position, in which they are disposed adjacent to said first struts, and a second position, in which they are disposed at a V-shaped angle (alpha) to said first struts.
