Abstract (en)

[origin: EP1935317A2] The water conducting household appliance has a washing space (12) that is limited by wall. A washing system (16) is provided in the washing space for cleaning of washing goods. A valve (26) is formed for optional activation of the rinsing element (30) and the washing system. The valve is formed to activate an additional cleaning element (38) that is provided for the cleaning of washing goods.
