Abstract (en)

[origin: EP1935323A2] The water-circulating home appliance has a washing space limited by container walls (70) and a fastening element (100), which has an axis, on which a roller (9) is arranged. The roller is arranged inside the washing space. A section of the fastening element extends through the container wall of the water-circulating household appliance and this section is formed for fastening components of the appliances.
