Abstract (en)

[origin: EP1935461A1] The article i.e. shoe holding device (3), has a controlling unit e.g. button (41), moving between locking and unlocking positions. The controlling unit has an attraction unit attracting a point of an exterior actuating unit e.g. ski stick (50), towards a receiving zone of the controlling unit. The attraction unit has a magnet (60) housed in a cavity formed in the controlling unit, where the cavity is formed towards the exterior of the controlling unit. A holding unit maintains the magnet in the cavity of the controlling unit.
