Abstract (en)
[origin: EP1935665A1] Holder for sheet-shaped products, such as information sheets, brochures, etc., which holder comprises two opposing side walls (40, 50), a rear wall (20), a front wall (30), situated opposite the rear wall, and a bottom wall (60), which walls together define a product space (70) for supportive reception of the products, and an opening, situated opposite the bottom wall, which allows the products to be introduced in a feed-in direction (A) from the opening towards the bottom wall. For the purpose of allowing effective stacking and providing satisfactory product support, the walls are configured to allow slide-in stacking of a number of holders (1, 1') in a stacking direction (B) which is substantially perpendicular to the feed-in direction (A), in which slide-in stacking the product space (70) of a first holder (1) receives at least one of the walls (20') of a second holder (1').
