Abstract (en)
A Container for loosely stored products has a container body (42) and container cap (44). Said container cap is formed to close a container opening (50) and a flow-limiting device (12) is arranged close to said container opening (50). Said flow-limiting device (12) has at least 2 through-openings (20) arranged distant from a centre axis (28) of said flow-limiting device (12). Said flow-limiting device (12) has a central area (30) arranged distant from said container opening (50), with webs extending between said through-openings (20), preferably outward from said central area (30).
