Abstract (en)

[origin: DE202006019060U1] The plate has an anchor head (2) that is adapted to a cross sectional profile of an anchor bar (10). The plate has an elongated, straight anchor plate web and a connecting plate web that extends to the anchor plate web, where a circular forming plate web is situated between the anchor plate web and the connecting plate web. The anchor head is arranged at a free end of the connecting plate web, and is provided for reinforcement with an angle of bend.
