Abstract (en)
[origin: EP1936086A1] Corner bearing fitting (10) comprises a side section (20) which is closed directly on a horizontal side (11.2) to create space for a corner strip. An independent claim is also included for a window or door with the corner bearing fitting. Preferred Features: The side section is molded from a vertical side (11.1). A supporting angular part (21) interacts with the vertical side and the horizontal side. The angular part is joined to a base plate (11) by welding, adhering, soldering or riveting.
