Abstract (en)

[origin: EP1936103A2] The present invention relates to a system for actuating a Venetian blind, a roller shutter or similar closing means of a door or door or window, comprising an electro-motor apparatus, a contact holder plate electrically connected to said electro-motor apparatus, and a command device transportable by a user and comprising means for the power supply of the electro-motor apparatus, and electronic control means of said apparatus. The plate and the command device are suitable for electrically and magnetically coupling. In particular, the electrical contacts of the plate and of the control device are obtained by magnets.
