Abstract (en)

The compressor (10) has a cylindrical case (16) formed with annular ferrules (20, 22) that hold annular rows of straightening vanes (14). The ferrules have cylindrical edges (26, 28) to carry annular flanges (30, 30'), arranged at equal distance from the ferrules, for fixing the ferrules between the edges. The edges form an annular groove around movable vanes (12) placed between the ferrules for assembling an abradable element, where the internal diameter of the groove is higher than the external diameter of a theoretical vein in a part of the case.

Abstract (fr)

Compresseur (10) de turbomachine, comprenant un carter cylindrique (16) formé de viroles annulaires (20, 22) portant chacune une rangée annulaire d'aubes fixes (14) et ayant à leurs extrémités axiales des brides annulaires (30, 30') de fixation des viroles entre elles, les brides de fixation de deux viroles adjacentes étant en direction axiale sensiblement au milieu d'une rangée annulaire d'aubes mobiles (12) située entre ces viroles.
