Abstract (en)
[origin: DE202006019378U1] The device has a door (1) comprising an inner lining (2) and two cross sections that are fastened between two vertically running bars. A separate closing cap (4) comprising side parts (8) is provided for closing an opening of the bars and arranged at front side of the cross sections in a mounted condition, where the cap is made from a fiber glass reinforced plastic. The cap has an engagement hook, and the cross sections comprise an extension (5) at a side, where the extension protrudes into the opening of the bars.
