Abstract (en)

[origin: EP1936751A1] The assembly has a flat cover shaped flap (30) with a joint (38), pivoted between a closed position in which the flap blocks an access to hollow tubular shaped secondary contacts (24) co-operated with primary contacts (20), and an open position in which the flap permits the access for connecting a plug (10) on a base. An annular sleeve (40) is fixed to an electrical cable/lead (14) and displaced between extreme positions such as lowered position in which the sleeve covers the flap when the plug and the base are connected, and raised position in which the sleeve permits an access to the plug.
