Abstract (en)

[origin: WO2007024930A2] The present disclosure relates to a black and color inkjet cartridge testing and refilling device and method of use thereof. The device includes a testing station and a refilling station to be used in conjunction with a user-friendly interface able to guide a user through the steps associated with refilling an inkjet cartridge. The device is able to store waste ink, contain an significant supply of refill ink, and even house stickers and clips to be placed on refilled cartridges to prevent drying. The device is able to guide a user through an initial determination of the capacity to refill the type of cartridge desired. The automated control system also helps users through easy cleaning procedures, test printing procedures, and purge operations.
