Abstract (en)  
[origin: WO2007033510A1] Printed products (2), in particular newspapers or magazines with various inserts, are packaged for distribution in a covering sheet (1) consisting, for example, of paper. The covering sheet (1) has at least one area that is completely punched out and/or at least one area (7) that can easily be separated from the covering sheet by a partially punched-out part. The punched-out area is a window (6) through which the title and/or the headline of a newspaper or magazine, which is packed in the covering sheet (1), becomes visible. Partially punched-out areas (7) of the covering sheet (1) are marked, carrying the corresponding print identifying them as a voucher, a reply card, a collecting card, a do-it-yourself kit or a toy and are separated from the covering sheet (1) for the purpose of various functions which are different from the cover function of the covering sheet (1).
