Abstract (en)

[origin: WO2007032628A1] A wheel cover structure for a vehicle includes a hollow protective case member which is secured to a wheel of the vehicle at one surface thereof, a rotation case member which has a floating chamber filled with liquid and is fixedly mounted to an inner surface of the protective case member by way of an outer bearing, and a floating member which is disposed in the floating chamber and is held in a constant direction. The floating member comprises a decorative plate formed with various pictures or patterns; and a floating plate coupled to the decorative plate and defined with a semi-circular cut-away portion on an upper portion thereof to form an air chamber.
