Abstract (en)

[origin: WO2007045987A1] New derivatives of 4-aminoquinoline which have a general formula A-X-Y-T where A is a 4-aminoquinolinic nucleus, X and Y are spacers and T represents a nitrogenous ring or an aminic group, substituted if necessary. These are powerful antimalarial compounds active on both chloroquine-sensitive and chloroquine-resistant strains of Plasmodium falciparum.
