Abstract (en)
[origin: WO2007045517A1] The invention relates to a roller bolt of window or door locking fittings, with a roller (2) mounted rotatably on a collar bolt (3). In order to develop a roller bolt to the effect that it can firstly be produced and fitted cost-effectively but, secondly, reduces the friction on the locking web and is more resistant to damage, it is proposed that the roller (2) comprises a metal sleeve (9) which bears a plastic casing (8).
