Abstract (en)

[origin: WO2007045730A1] The invention concerns a system for selecting and matching requests and offers for sub-contracting of an Internet or like network user and one or more other Internet or like network users, including the following steps: a) registering at least one subcontract applicant by assigning an identification thereto; b) registering at least one subcontract offerer by assigning an identification thereto; c) storing at least one subcontract request; d) storing at least one subcontract offer; e) comparing the request and offer digital codes; f) selecting the offerer's identification(s) so as to enable a match, each subcontract request is executed in response to an open and open-ended selection means permitting multiple choices per category and each subcontract offer is performed in response to a closed and sequential selection means permitting limited choices per category.
