Abstract (en)

[origin: WO2007033996A1] The invention concerns a safe device for collecting coins, comprising a support for receiving a coin boxes including a hatch controlled by an internal mechanism. The coin box comprises: locking means to enable it to be introduced into and withdrawn from the support; locking means to enable the hatch with internal mechanism to be opened. The internal mechanism acts on the hatch: by opening it when the locking means enables same and when the coin box is introduced into the support; and by maintaining closed otherwise. The invention also concerns a safe method for emptying coin boxes. The invention is applicable to contact-free transfer of coins.
