Abstract (en)

[origin: WO2007024077A2] In one embodiment, the method includes determining which one of a primary subtitle associated with a primary video stream and a secondary subtitle associated with a secondary video stream to display based on management information stored in a memory. The secondary video stream represents the picture-in-picture presentation path with respect to a primary presentation path represented by the primary video stream. The primary video stream is recorded on a recording medium. The determined subtitle is selectively reproduced based on the management information.
