Abstract (en)

[origin: WO2007038270A2] A method and apparatus includes a portable electronic memory storage device and a plurality of exhibitor computers, each having at least one specifically identified electronic uploadable file and a port adapted to selectively interface with the portable device. When a portable device engages a port, electronic content corresponding to the port is uploaded from the computer to the portable device. In another embodiment, data from the portable device, such as demographic data, is also downloaded to the exhibitor computer.
