Abstract (en)

[origin: DE102005049338B3] A system for digital document data acquisition and storage in which a digital camera (3) has an image resolution of at least 2 million picture elements and the optical positioning aid (4) is a separate laser which by use of holographic optics indicates the edge of the photographed image zone with four lay edges. An independent claim is also included for implementation of an optical positioning aid.
