Abstract (en)

Described herein is a toilet brush (20) provided with interchangeable components, of the type that can be inserted inside a container (22), provided with a handle-stick (32) and a head (24) which forms the lower end of the handle-stick (32). The handle-stick (32) is provided with a hollow tubular upper portion (34) at the lower end of which, constrained in a rotating manner there is a cover (38) for the container (22). Inside the lower end of the hollow tubular upper portion (34) is inserted in a non-removable manner at least one releasable coupling element (42), configured to be engaged with a corresponding releasable coupling element (44) made at the upper end of the head (24), thus joining in a non-removable manner the head (24) itself and the hollow tubular upper portion (34) of the handle-stick (32).
