Abstract (en)

[origin: EP1938973A2] A drive device has a main drive exerting a drive torque on a train of wheels via a driven coupling. The main drive (13) is coupled to a central re-cooling unit (20) via a first conduction system (21) and an advance (18) and a return (19), and a main drive (13) of a first conduction system (21) advance and return run (18,19) and re-coupling unit form a through-flow circulation system.
