Abstract (en)  
[origin: EP1939010A2] A bookbinding pressing machine (40) has press devices (41) and with each assigned with decorative folding devices each with a pair of variable spaced, opposite facing and heatable fold shaping rails (42.1) for forming the book cover folds (1c). The press devices (41) are driven with the decorative fold devices in a closed circulation path mainly extending in the vertical plane, such that the press plates (41.1) are oriented parallel to the extended plane.
