Abstract (en)
[origin: EP1939834A2] The system has a receiver (1) receiving digitally coded traffic information from traffic information services. A central unit (13) is provided for computing a route from a starting position of a land vehicle to a destination position and computing a route guidance using the traffic information. The traffic information is supplied to a service classification unit (3), which contains an evaluation classification of the service. The traffic information of the selected service is fed to the central unit for computing the route and the route guidance.
