Abstract (en)
[origin: US2009077776A1] The invention relates to a method of, and an arrangement for, producing a fixing means, for example in the form of a touch-and-close fastener part, comprising: the formation of a carrier structure (10) which is provided with stem-like fixing elements (12) which are connected to one another at least in pairs, via an intermediate element (14), to form a cramp-like, in particular U-shaped, fixing part (16), wherein the stem-like fixing elements (12) engage through the carrier structure (10) and project beyond the same, and the intermediate element (14), which extends between those fixing elements (12), is arranged on the carrier structure (10), and wherein the respective fixing part (16) is introduced as a whole into the carrier structure (10), which, for this purpose, is designed in the form of a cramp-like, in particular U-shaped, moulding prior to introduction.
