Abstract (en)
[origin: WO2007044551A2] There is provided a storage caddy (10) that can safely store a variety of blades for a food processor. The storage caddy (10) includes a housing (12) and a handle (14) to enable easy transport of the storage caddy (10). The housing (12) can include a top portion (16), a middle portion (18), and a bottom portion (20). Within these portions can be various cutouts or grooves (42, 48, 56) that can hold various food processor accessories, such as blades, disks or stem holders, hi a preferred embodiment, a circular opening (64) can be located on the bottom of the storage caddy (10). This opening (64) can enable the entire storage caddy to be placed within a food processor for storage purposes. The opening (64) at the bottom of the storage caddy (10) can be placed over the drive shaft of a food processor and the food processor can then be closed with the storage caddy inside.
