Abstract (en)

[origin: WO2007045747A1] The invention concerns a closing assembly for a container (7) comprising a base (1) and a cap (4) adapted to be assembled with the base (1) and designed to close an opening (2) provided in said base (1), said opening (2) of the base (1) emerging onto a contact surface (9) of the substantially flat base and designed to be arranged opposite the inside of the container (7). The cap (4) comprises a closing portion (10) matching the opening (2) of the base such that once the cap (4) is assembled with the base (1), the closing portion (10) is tightly mounted with at least one zone of the opening (11) located at said contact surface (9) of the base, the closing portion (10) of the cap (4) further comprising an end surface (12) contacting the product coplanar with the base contact surface (9).
