Abstract (en)
[origin: WO2007048807A1] Lifting ram for lifting platforms, in particular for underfloor lifting platforms, comprising an inner tubular body (4) and an outer at least partly tubular body (3) which at least partly surrounds the inner tubular body (4), wherein the outer tubular body (3) and the inner tubular body (4) are at least frictionally connected to one another via connecting elements (5a, 5b). In this case, the lifting ram is an element extruded at least in sections.
