Abstract (en)
[origin: WO2007045805A2] The invention relates to a material comprising a substrate which is provided with a titanium oxide-based coating which is topped with a thin hydrophilic layer. The aforementioned thin hydrophilic layer forms at least part of the external surface of the material and does not comprise titanium oxide. The invention relates to the use of said material in order to prevent mineral fouling from being deposited on the external surface in the absence of water runoff.
