Abstract (en)

[origin: WO2007039554A1] The invention relates to a method for producing granular or powdery detergent compositions, involving the production of a detergent base powder by drying an aqueous detergent slurry. The invention is characterized in that a copolymer is added to the slurry. This copolymer can be obtained by radically copolymerizing: (A) 20 to 80 % by weight of at least one monomer from the group of monoethylenically unsaturated monocarboxylic acids, dicarboxylic acids and dicarboxylic acid anhydrides, and; (B) 20 to 80 % by weight at least one monomer from the group of aliphatic or aromatic monoolefins.
