Abstract (en)

[origin: EP1780287A1] In-vitro method for the recognition, determination of severity level and for the process of evaluation and prognosis of neurodegenerative disease comprises detecting the presence and/or concentration of the carbamoylphosphate synthetase 1 (CPS 1) and/or physiological appearance of CPS-1 fragment with CPS-1 immune reactivity in the biological fluid of the patient suffering from neurodegenerative disease and determining a therapy with respect to the existence, advancement, severity level or feasibility of the disease.
