Abstract (en)

[origin: DE102005045535A1] The housing (10) has a mantle (12) including a clamping section (20). A changeover section is attached in the clamping section in an axial direction. A connection section (26) is attached in the changeover section in the axial direction, where the connection section has a diameter, which is larger than that of the clamping section. The connection section is formed as a cone section and is a part of a hyperboloid. A connector (14) is connected with the mantle and has a joint section (15) that is inserted into the connection section and/or firmly connected with the mantle. An independent claim is also included for a method for manufacturing a housing for a component of an exhaust gas system.
