Abstract (en)
[origin: WO2007049197A3] The present invention relates to an oven (1) wherein the cooking process is continued when the heater (2) is turned off while the fan (3) is operated at the end of the cooking time selected by the user and consequently the total operation duration of the heater (2) is reduced providing savings in the consumption of energy, since the residual heat in the oven is used for finishing cooking of the food.
