Abstract (en)
[origin: WO2007125316A2] Various embodiments of the invention provide a more secure financial transaction system for e-commerce sectors that (1) more securely processes payment transactions, (2) helps to protect merchants and banks against fraudulent transactions, money laundering, and underage gambling, and (3) helps to limit other abuses in areas of e-commerce that are perceived to pose special risks, such as Internet gaming, travel, and consumer purchasing of electronic goods. To accomplish the above goals, various embodiments of the financial transaction system (1) establish operating and transaction processing protocols for merchants, Internet payment service providers, acquiring banks, and card schemes and (2) provide automated systems for monitoring and securely processing payment and financial transactions.
