Abstract (en)

[origin: WO2007041978A2] The invention relates to a method for testing the accuracy of answers to quiz questions. A quiz master and a participant use, respectively, an identical quiz computer whereby an answer code sequence is subsequently compared by means of a solution code sequence when a button on the quiz computer of the participant is actuated, and the correct and incorrect answers of the participant, associated with the question, are displayed on the display either successively or simultaneously as "correct" or "incorrect".
