Abstract (en)
[origin: EP1941811A1] Comprising a prism-shaped frame with a rectangular bottom (1), two larger sides (2) and two smaller sides (3), the free edges of which limit an upper opening. The invention also incorporates an inner frame (4) which has two inverted-"U"-shaped rods. Based on this premise, the bag is characterized in that it includes removable means of attachment associated to the inner frame (4), said removable means being located at the opening of the bag. The invention is also characterized in that it incorporates a folding and unfolding device which ensures the stability in each of two positions.
